

Providing a Path for Veterans Affairs Supply Chain Modernization Success

Document Storage Systems, Inc. (DSS) has been a catalyst for health care innovation for 30 years. DSS is committed to assisting the Department of Veterans Affairs (VA) on their journey in becoming a High Reliability Organization (HRO) by meeting top initiatives, changing regulatory requirements, and implementing enhanced business transformation across VA enterprise.

-  Tens of thousands of clinicians and administrative staff daily use our software nationwide across various health care settings
-  Trusted by the VA for 30 years, DSS is a large company with approximately 700 employees (average tenure 15-20 years) and more than \$150 million in revenue
-  Leader in the use of Human Centered Design and Scaled Agile Framework (SAFe) development methodologies
-  HealthShare Health Connect HL7 Solutions Certified

- **Work Order Management** - Data Management (clean up and standardization of records), Entering/Editing of Records, Reporting, and Bulk Editing

Change Management

Performance Management

- Enterprise Analytics & Reporting

How Can We Help

DSS develops interoperable solutions that facilitate rapid integration of commercial-off-the-shelf (COTS) products to Veterans Health Information System Technology Architecture (VistA). This agile capability allows the VA to modernize existing platforms with best of class capabilities.

Solutions provider with VA enterprise expertise

- **Nine (9) National Veterans Health Administration (VHA) contracts** (more than \$125 million in awards, FY '21)
- **Current VHA Supply Chain transformation system** - Logistics and Prosthetics Suite (LPS) addresses the deficiencies of the VistA Generic Inventory Package (GIP), Vendor File, VistA Automated Engineering Management System/Medical Equipment Reporting System (AEMS/MERS) and Work Orders sections of VistA
 - **Above PAR** streamlines the end-to-end workflow processes, enable data clean up, assist efforts towards standardization, and improve reporting requirements for vendor file, expendable (EX) inventory management, non-expendable (NX) equipment management and work orders
 - **Advanced Prosthetics Acquisition Tool (APAT)** fully automates the purchasing workflow from start to finish for departments that procure prosthetics, orthotics and other sensory aides automates entire prosthetics purchasing workflow
- **Revenue Cycle Management** - VistA-Integrated Revenue Reporting (VIRR), formerly Encoder Product Suite (EPS)
- **Comprehensive Dental Management** - Dental Record Manager Plus
- **Enterprise Interoperability Platform** - DataBridge Integration Framework, VistA Service Oriented Architecture (VSOA), Rx-Framework
- **Tissue and Implant Tracking** – Unique Device Identification (UDI) Tracker streamlines and automates the complex processes associated with tracking tissues and implants for surgical cases

Systems Integrator for VA Information Technology ecosystem for the past 30 years

- 40% of current VistA Application Programming Interfaces (APIs) were created by DSS
- VistA/Computerized Patient Record System (CPRS) integrator for commercial product vendors – including Cerner
- 3,000 VA Medical Centers installations

DSS can assist VA in achieving a fully interoperable, easy to operate, and comprehensive supply chain management solution based on proven technologies and expertise.
